# MONITOR POLE

FOR ONE OR TWO MONITORS

Looking for a monitor system that optimizes the space on the desktop - look no more. This Monitor Pole is recommendable for that purpose, since the extension arms can be installed on both sizes of the aluminium pole, and thereby preferable for the smaller working environments where space might be minimized.

## CHARACTERISTCA:

- Cables and wires are hidden from sight within the 30 cm. aluminium pole, which creates a clean desk expression in the working environment.
- This solution is "strong" enough to support the screens of the very large arches. Remember to order a large vesa bracket attachment as well.
- the Screen Pole can carry a max of 2 screens of 27", with a maximum weight of 8 kg. Or 1 monitor of 49 inches for a weight of 16 kg.

## MONITOR POLE

Monitor Pole with one VESA. No extension arms included!

Through-desk mount: 4130-G

Desk clamp: 4130-K

Monitor pole: 300 mm.
