NEWLINE

Newline has three different installation opportunities: either by installing directly underneath the desktop or with either the swivel bracket or sliding/swivel bracket. The last two solutions are optimal choices if the table frame has a disrupting placement. Especially the sliding/swivel bracket is recommendable if the USBs are placed on the top of the computer.

CHARACTERISTCA:

- Thinner wall thickness and different production methods makes the Newline a cheaper alternative, but definitely not a worse option! No compromises in terms of quality and design have been considered, since PJ Production wants to ensure a high standard of products on the market.

CPU-HOLDER, NEWLINE
