# MO-CUP

---

The cup-holder can discretely be installed underneath the desk. The solution is ideal for smaller offices, since the cup-holder generates a depositary removed from the desktops. Furthermore, when removing the cup from the desk, the problem with damaged computers due to spilled liquid, - especially coffee, will be decreased.

## CHARACTERISTCA:

- **The cup-holder is named: MO-CUP, because of the multifunctional design.**

Besides the space for a universal cup, the cup-holder has an integrated holder for a phone in the front. The phone can be charged while being placed in the cup-holder due to the hole in the bottom of the design.
